

QA Feature Testing Guide

EMS pack v0.1.6 · Agent 1.1.5 · branch desktop+agent · docs 2026-09-20

Every feature, sensitive-data checks, and fix path. Never wipe ems.db.

1. Roles & sensitive UI

	Admin	Manager	HR	Employee
ents / \$ / ce badges	Yes	Yes	No	No
oads (Setup)	Yes	No	Yes	No
PWA install	Yes	No	Yes	No
bell + Test	Yes	Yes	Yes	No
days yee owns	Yes	Yes	Yes	N/A (own %)
nshots of	Yes	Yes	Yes	Self only

2. Feature checks

Advance pending hidden from staff

Check: Login as employee → My Projects. Cards must NOT show Advance pending / Deposit due / red pay row. Admin still sees Deposit due / Final pay.

Sensitive: gate blanked in API for non-finance; UI badges finance-only

If broken: Pull latest API+web; hard refresh Desktop.

Past 7 days dropdowns aligned

Check: Dashboard → Past 7 days. Names left; "N updates" right-aligned in same column; chevron far right.

Sensitive: attendance/progress aggregates

If broken: CSS grid on .dash-progress-emp summary.

Notify bell + sound

Check: Admin Desktop: open bell → Test sound (beep). Then unpaid soft-gate or staff % save → badge + beep within ~45s.

Sensitive: office_notifications

If broken: One click unlocks WebView2 audio; Test sound verifies speakers.

Downloads nav

Check: Admin/HR see Downloads. Manager/Employee/Demo do not; /downloads redirects home.

Sensitive: binaries distribution

If broken: Admin hands Agent zip to staff offline if needed.

Click-to-update (Desktop/Agent)

Check: Banner when server version higher → click → background install. Enroll + DB stay.

Sensitive: local binaries only

If broken: See PDF 06. Host HTTPS zip/Setup on /downloads/.
